

Health Office Request

Dear Parents,

The colder weather is fast approaching and we are trying to squeeze in all the outside recess we can between the rain showers. Please send your student with appropriate clothing for the weather. At this time of the year we need to take into consideration the wind chill factor and the lack of sunshine.

The temperature may say 60 degrees but with no sun and the wind blowing the actual air temperature could be below 50 degrees. I know as children grow up they don't want to wear jackets to school but we don't want to keep a class in doors because the majority of the students have no sweatshirts, jackets or sweaters.

It is our job at Seton to see to the welfare of your child when they are in our care. We cannot in good consciousness send your student outside if they are not dressed appropriately for the weather.

Thank you,

Nurse Anne
