

12/9/2020

Dear Parents,

Please remember if you travel over the holidays or might have relatives from one of the restricted states come to visit, *please*, read the NYS Travel Advisory Laws before making plans. Be sure to plan quarantine time and add waiting time for getting your test results back into your time off school. If your student travels outside of New York State they **must** have a negative COVID test result before returning to school. The rapid test performed here at school is not sufficient per NYSDOH. Please let your student's teacher know what classroom work will be needed for student during the time they are not present when school is in session; unless the student is infected they are required to participate in distance learning.

\*\*Note teachers and nurses are mandated reporters, if a student is in school and the parents have not followed the NYS regulations we are required to report this to MCDOH, since the student is a health hazard to other students \*\*
